EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Alfred Fressola on January 6, 2010.

The application has been amended as follows:

In the claims:

Claim 12 has been canceled.

2. The following is an examiner's statement of reasons for allowance:

Applicant's Specification discloses two separate timers, one implemented at layer 2 (L2) and one in the speech codec, used to transmit or generate dummy blocks during periods of silence in a discontinuous transmission (DTX). 3GPP TSG RAN Working Group 1 Meeting No. 11 (Tdoc R1-00-0302) discloses a method for determining the length of the timer longer than other probe timers used for transmitting a broadcast probe in order to maintain synchronization when no data has been transmitted, i.e. silence is detected, for a certain period of time, and forcing a transmission after a length of time if no data has been transmitted.

The prior art fails to anticipate or render obvious the following recited features in independent claims 2, 6 and 9: classifying the telecommunication connection according to channel type and interleaving type in the communications device and determining the maximum length of a silent period according to the classification of the telecommunications connection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
